Not the art of perfume making By Cynthia Scott The title of the book should only be 50 all natural fragrance recipes and it should leave out the part that says the art of perfume making made easy. Also I do not believe there are actually any technical "perfumes" in the book. It's a book giving you many recipes for scents to wear. Most you have to shake before using, True perfume does not require shaking. I was looking for several things: what "note" each essential oil is, an exhaustive list because there are only about 100 EOs so it wouldn't have been hard to do. But it doesn't even go into how to create scents based on notes. There is so very little explanation, none really, as to why certain things work with others or any explanation regarding how much

one should use of certain scents like cinnamon based on how strong they are. It does not go into any explanation about preservatives. There is no master recipe that you can use in order to create your own perfume. There are no precautions. If you are looking for easy recipes that you can make with things which you mostly already have in your scent-making materials, then this is a book that would prove useful. I believe the fragrances probably only last a few months, not years. I wish she had given some idea on expiration dates or better yet an explanation on why certain things would need expiration dates. There aren't any preservatives as far as I can see and some of the recipes are definitely ones that would trap bacteria in them! For instance an oil plus a wax and some EOs without some preservative will not last very long at all. So while I might try a couple of her recipes I will not likely give any as gifts because I'm not clear on how long they last nor do I want to tell someone they have to shake their "perfume" each time they use it! I gave it 3 stars instead of two because there are indeed 50 fragrances and that's half of what the book promises. 2 of 3 people found the following review helpful. For kitchen "perfumers" only By Marko Ramius Decent book but if you're looking to make real perfumes this isn't the book for you. Ultra basic book which provides only simple skeleton recipes. This could have been written in 20 pages or less as the type is large and most pages are nearly empty (assuming for notes?). Most contain the same procedure of "mix everything together and shake or stir" with little variation. If you're a person who is afraid of mass-produced fragrances and want to make fragrances in your kitchen then by all means purchase this. The "recipes" typically use only 3-5 ingredients, some of which are cheap household items, yet use others which are very expensive perfume ingredients. It's a non-directional mish-mosh. 3 of 3 people found the following review helpful. Nice assortment of recipes! By S. Cunningham Some great recipes that I can't wait to try. I've been buying oils so that I can make the mixes just right. Some oils are expensive, so shop carefully.

50 All Natural Fragrance Recipes - The Art of Perfume Making Made Easy On the search for easy and natural fragrance recipes? Then this book is exactly what you are looking for. You can learn and enhance perfume making skills with the range of easy-to-follow recipes in this book. The fundamental art of blending different oils to create new scents is the essence of this book.
