Since I enjoy classic interior design themed publications, I decided I wanted to add the book to my collection. I chose as my source, thinking I would get the best price. I did well with the pricing but the description of the condition of the book was generic and inaccurate. The book that was shipped to me had previously been given as a departing gift for an employee leaving a job. This was evident by the MANY personalized inscriptions and messages inside the front and back pages of the book, as well as the "Farewell - You will be missed" card, made out to the original recipient that had been left inside the book. Had I known the book had this much writing in it, I would have DEFINITELY chosen a different seller with a cleaner book. Lesson learned. Look for a more detailed and personalized description of the condition of the item and not one that the seller uses as a "blanket statement" that just covers a generalization of all their items. Yes, it is faster for them to list hundreds of items this way but it does a dis-service to the buyer, as in my case. 0 of 0 people found the following review helpful. Supersatisfied By Dedicated Gardener This is a lovely book. I just received it and have only had time to browse through it quickly but can already see it's going to be a favorite. I'm very visual and the pictures are lovely and inspiring. I highly recommend it if you get inspiration from lovely pictures. The text adds to the overall beauty of the book. 0 of 0 people found the

following review helpful. Too pretty to pass up. By Nana to two. Lovely to look at and very inspiring too!
