cup but it twists to lock it onto the surface. It does say in the remarks and qa what it should adhere to, but it's also suggested to just try and if you want to return it bc it doesn't stick that it's no problem. So I see that as really good CS. Anyway, it wouldn't adhere to our new ceramic shower walls and I didn't want it on the glass doors. We remodeled and included a spa unit that is stainless and I was able to stick it to that with no problems. Used it today in the shower and no fog on it, either. All around I'm happy with the size, the adherence, and the fogless abilities. I purchased this mirror at a discount to trial and review. I give it 5 stars. Please ask if you have any questions. Thanks for reading. 0 of 0 people found the following review helpful. Five Stars By Toni Bihm Very easy to understand, well written 0 of 0 people found the following review helpful.
