Design Eye Publishing Ltd., Kath Smith, Richard Jewitt : Amazing Automata -- Dinosaurs! (Dover Origami Papercraft) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Amazing Automata -- Dinosaurs! (Dover Origami Papercraft):

0 of 0 people found the following review helpful. Dinosaurs live again! By Thomas Nealeigh We purchased two copies of this book for the grandchildren ages 8 and 6. (Two copies to keep them from arguing about who-gets-to-do-what.) The pieces are easy to remove from the book (not always the case with other punch-out books), the printing is excellent, and the resulting dinosaurs provoke hours of fun after their assembly. The children are curious, too, about what makes them work. Perhaps we have engineers in the making. 0 of 0 people found the following review helpful. Good book indoor fun By Michael C. Crownhart A great book for indoor fun and dinosaurs. The dinosaurs fit in your house and are automated. 2 of 3 people found the following review helpful. These are very hard for children to assemble. To ... By Prairie Girl These are very hard for children to assemble. To be honest, they were challenging for my husband and I also.

Create moving models of five different dinosaur species from ichthyosaurus, the fish lizard, to Tyrannosaurus rex, the tyrant king, along with the armor-plated stegosaurus, the flying pterodactylus, and the bone-headed pachycephalosaur. Kids ages 10 and up can follow simple directions that explain how to build the crank-powered replicas. The book is also loaded with facts about all sorts of dinosaurs and includes a background play scene and a

convenient pocket for storing loose pieces.
