Mihoko "garden" Kurihara : garden COLORING BOOK before purchasing it in order to gauge whether or not it would be worth my time, and all praised garden COLORING BOOK:

9 of 9 people found the following review helpful. Simply lovely! By Dee Z Incredibly beautiful and whimsical drawings of nature. The detail in the flowers and animals is lifelike as you see in the examples. Drawings are on both sides of the page and the cream colored paper is a nice weight. 3 of 3 people found the following review helpful. Very creative illustrations. Poor paper does not hold up to a pen with ink. By Ethel This is a beautiful, creative book with lovely illustrations. I use colored pencil, as well as pen on my pages (for the small areas), and find that any of the pens I have, which usually work just fine for my other books, bleed through the back of this paper. Unfortunately there are a lot of small spaces in need of a pen. I like the book well enough to order some gel pens to see if I can get better results than with my typical fine liners. If you enjoy shading and the use of your pencils, this is just the book for you to enjoy. 2 of 2 people found the following review helpful. A must have if you color with pencils. One of the most fabulous books I have purchased in a long time. By Colorista This book is extraordinarily beautiful! The beauty of it begins with their creamy white vellum paper. No, this book does not have ordinary paper....it is designed for colored pencils, as it is a vellum. If you love using colored pencils, you will be in heaven! Layer away!!! The art is fantastic. If you love nature, this is the book for you. There are all kinds of critters, not just garden critters. Ready to color a

gorgeous pair of penguins?
