Jayne Persico : Glass Kiln Casting with Colour de Verre - 10 Projects for Frit Cast Jewelry, Plates Bowls
before purchasing it in order to gauge whether or not it would be worth my time, and all praised Glass Kiln Casting with Colour de Verre - 10 Projects for Frit Cast Jewelry, Plates Bowls:

I love glass casting with Colour de Verre molds, and have several of them. I hoped the book would suggest some projects that I could create. No, not really. The book isn't bad, but it's also not great. It's only 80 pages, and published through a small press, which explains why it's fairly expensive. One of the

things I was disappointed by is most of the first 20 pages is filler. Priming the molds, knowing your kiln, programming a digital kiln, and playing with frit are things that anyone planning on using molds in glass work should know. That takes up almost of the book. The projects aren't bad, once you get there. About every other project you get a 2 page spread of variations on the projects that have come before. It's nice to see the variations so you can get ideas of the different ways to apply the glass pieces once you're done. 0 of 0 people found the following review helpful. Five Stars By RC Exactly what I was looking for 0 of 0 people found the following review helpful. No mold making advice - Book covers how to use their products By So The Wind Wont Blow It All Away I did not realize that Colour de Verre was their products, they are selling. This book does a great job showing how to be successful using their molds. I actually thought I was going to learn how to make my own ceramic molds in this book. So, I purchased the wrong book, my fault. The book is well done, cant go wrong if this is what you need.
