A servicable book designed more for the scrapbooking crowd than ...By Barry MorentzA servicable book designed more for the scrapbooking crowd than for the serious bookbinder. The instructions are in general quite satisfactory for those with little experience, but such folks will still need in-person demonstrations. My 30 years of binding experience and teaching have revealed that many people are terrified to work

with glue, let alone in a case-bound book. My overall objection to the book is that the title is misleading. One would think there would be 18 variations of case-bound, concertina, Coptic, Japanese, and pop-up books, among others. Instead you just get 18 different themes: weddings, birthdays, anniversaries, etc., all within the same basic structure. But at only 5 bucks on I can't complain.
