**Trond Anfinnsen : HatHeads: 1 Man + 2 Knitting Needles = 50 Fun Hat Designs** before purchasing it in order to gage whether or not it would be worth my time, and all praised HatHeads: 1 Man + 2 Knitting Needles = 50 Fun Hat Designs:

You really get an accurate representation from the cover so I can't blame anyone but myself for buying it. But I got it for half price used so I guess it's worth that. So, in short, all the patterns are beanies. It's kind of a diary of "what kind of hat did I knit for each of my friends/family". A person is named and their particular awesome-ness is described. Then there's the pattern for their hat. Pretty much all basic stockinette with some sort of intarsia design. The majority of the hats sport this design in a band around the bottom. A few are ribbed. There are some others that are more complicated but, for the most part, they differ only in sometimes creative use of color; stripes in various directions, etc. I'd recommend trying to borrow this book from a friend or the library. There will probably only be a handful of patterns you'd actually want to use. This book would be a better blog, with all the patterns available individually. I don't think they're bad patterns, they just don't rate their own book. 0 of 0 people found the following review helpful. Liked the personal touch. By T. Abel Lots of designs. Liked the personal touch. 0 of 0 people found the following review helpful. Five Stars. By Judy Kersey I really admire this guy's determination and creativeness!

After teaching himself to knit, author Trond Anfinnsen found that pull-on hats aka beanies or skullies were the perfect-size project. As his pile of hats grew, so did his knitting skills, and soon he began personalizing the hats for family, friends, and friends of friends. Each person received a unique hat designed to suit his or her coloring, personality, and style all for free. Trond eventually teamed with photographer Klaus Skrudland to document what had become an interactive art project, taking portraits of each recipient in his or her hat. Together, the two created, gave away, and photographed more than 200 hats. HatHeads shares 50 of these hats, all the same beanie shape but with a wide range of designs, offering something for everyone. Each hat is modeled by its recipient, with a full pattern and a funny, affectionate description of how that person inspired the design. Readers then learn how to pick up where Trond left off and create unique, personalized hats for their own friends and loved ones. Designed in a fresh, graphic style, HatHeads is as unique as its hats, a heartwarming celebration of people, knitting, and the joys of giving.
