Great projects but assumes a good knowledge of scroll sawsBy John LambertI liked the range of different projects and the fact that using a scroll saw can make some three dimensional models. However, being new to scroll sawing I would have preferred some more information about using the saw. For example many projects require some long straight lines (eg cutting out the front windows of vehicles). But once I am sure I will make several of the projects. It will also help me to design other projects.0 of 0 people found the following review helpful. Five StarsBy Knut EkebergEasy to follow projects1 of 1 people found the following review helpful.
