Ivor Carlyle : Scrollsaw Toys For All Ages before purchasing it in order to gage whether or not it would be worth my time, and all praised Scrollsaw Toys For All Ages:

Children will squeal with joy when they receive these colorful wood toys--but don't be surprised if adults can't resist playing with them too! And because the scrollsaw is such an accurate, user-friendly tool, any enthusiastic woodworker can take on these projects with confidence. Guided by templates--an introduction to tools, techniques, and materials; cutting lists; a wealth of tips; big color photos--construct one (or all) of the 11 playthings. There's something to please

every child, including a nursery-rhyme mobile for babies, a tow-along ladybird that toddlers can pull, a mountain passenger lift, a come-apart car to enthrall young mechanics, and a Mars Pathfinder game for older kids. Each toy is superbly finished, many with an ingenious paint stamp technique so simple and effective, you'll want to use it on walls, cards...everywhere! 176 pages (all in color), 8 1/4 x 11.
