.com Painting on silk can be an elaborate, labor-intensive process yielding highly artistic creations, but it can also be a relatively simple craft allowing beginners to produce pleasing results. This little book follows the latter approach, demonstrating that with minimal equipment and just a tiny bit of practice, anyone can achieve these brightly hued, cheerful designs. Flowers, sea creatures, farm animals, angels, and abstract designs bedeck pillows, cards, bags, pictures, and other items, all with step-by-step instructions for transferring designs, painting the silk, and making up the finished piece, plus ideas for special effects and tips on choosing silks and paints. If silk painting interests you but complicated projects intimidate you, this is a good place to begin. --Amy Handy About the Author Susan and Martin Penny are regarded as leading experts in the craft world, working as freelance editors and editorial advisors to book and magazine publishers.
