**Kerri Mixon : Soapmaking 101: Beginning Cold Process Soapmaking (Soapmaking Studio Class Workbook) (Volume 1)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Soapmaking 101: Beginning Cold Process Soapmaking (Soapmaking Studio Class Workbook) (Volume 1):

4 of 4 people found the following review helpful. Not recommended - Should only be sold to class students. By WOOLYLAMB Not impressed with this book. It looks like it would compliment one of the author's classes, but it is almost worthless to a beginner soapmaker trying to learn on their own. There are loads of beginner books for soapmaking, which provide more thorough information for beginners. This book is very thin and contains little instruction. A chunk of the book are blank note pages. About 1/3 of the book lists vendors and a glossary. The bulk of the book with any content (about 1/2 the pages) focuses heavily on lye and looking at MSDS pages from suppliers.

While lye safety is important, spending a full page out of 29 content pages just on safety goggles is a bit of a waste. The couple of pages that provide any instructions are very light with short steps and no explanation. I believe the author should only sell this book to students in her class. The price seems a bit high for the content. 4 of 4 people found the following review helpful. Love the BOOK!!! Love the Class !!!By Mike SrThe book is easy read and is very helpful. I have read 6 soap books and this was the best and most easy to pick up and make soap. I am taking the class and so far I have had nothing but a GREAT time. I would recommend the book and the class. 0 of 0 people found the following review helpful. Five StarsBy CustomerVery helpful book. Mrs. Kerry knows her stuff.

Learn to safely and accurately make soap by hand at home. This workbook and companion class include soapmaking safety, creating a soap recipe to fit a mold, understanding oil specification sheets and saponification values, calculating lye quantities without using a "lye calculator," and formulating the soap recipe with the correct ingredient proportions necessary to complete the saponification reaction in the mold. Cold process soap does not have to be shelved to cure for six weeks when using the formulas and methods taught in the workbook and class. Enjoy the craft of making handmade soap from scratch using natural oils and safely use a bar of soap the same week it was made.

About the Author Kerri Mixon is a 16th generation soapmaker and the owner of multiple soap-related businesses. Her articles on soapmaking have appeared in numerous trade publications. A seasoned instructor, she has taught soapmaking classes to students and live audiences across the United States. Master soapmaker Kerri Mixon's passion for soapmaking is obviously contagious; several graduates of her soapmaking classes now run their own successful soap, body care, and cosmetics businesses.
