Not that badBy depmodI was in need of a color wheel for graphic design and wanted something other than the usual cardboard wheel so this poster interested me as an alternative. I read the previous reviews before purchasing so I was a little hesitant, but it ended up being just fine. It's now hanging on my office wall and it is not that small. True, you can't see the numbers on the color plan key from a distance, but you can still get the idea of which colors are complementary and triadic by seeing the direction of the colors. I'm looking forward to using it in making color selections for my designs. The only reason I didn't give it 5 stars was to the creases from it being packaged folded.2 of 2 people found the following review helpful. Almost Perfect ...By MeghanThis would have been 5+ stars if it had come rolled up rather than creased and folded. Considering it's meant to be up on a wall and not in a drawer that would have been preferable. Other than that it's a great color wheel with LOTS of information. It will make a nice addition to my sewing and craft room. I plan on getting it laminated first. Hopefully the creases will disappear a little. I'll update the review after I have it done.18 of 18 people found the following review helpful. Great poster, butBy Jenny TThis is a great poster, but it was well folded. I would pay twice as much to have it shipped in a tube, so that I could frame it.

Color formulas have never been more picturesque. Displaying this large-format color wheel on your wall makes it

easier to find the perfect combination of colors, tints, and shades for any creative project. The high-quality paper and printing ensures durability and true color representation. On the reverse side of the poster is an rich photographic collage of imagery that is sure to inspire.
